SHIPMENT TO _____
CONTAINER NO: _____
TOTAL CONSIGMENT IN KGS _____
P O NO _____

As far as we are aware the production of teas in Kenya does not involve genetic manipulation either of seeding or vegetative propagated plants. No genetically modified organisms (GMO) are used in the fertilization of tea plants or in the manufacturing process, again as far as we are aware, at least in this country. Further, Kenya has no intention of producing genetically modified (GM) teas.

The above consignment of Kenyan origin Tea which has been authorised for exportation and we hereby certify as in conformity with the above certification.
